DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 16-19, drawn to a method of separating nucleic acid molecules by hybridizing at least one primer to a heterosequence site and elongating the primer, classified in class 435, subclass 91.1, for example.
 - II. Claims 7-10, drawn to a method of separating nucleic acid molecules by hybridizing at least one primer to a heterosequence site and a ligation primer to the heterosequence site and ligating the specific and ligation primers, classified in class 435, subclass 91.52, for example.
 - III. Claims 11-15, drawn to a method of separating nucleic acid molecules by hybridizing at least one primer to a heterosequence site and separating the hybridized nucleic acid complexes which have complete complementary hybridization from the hybridized nucleic acid complexes which do not have complete complementary hybridization, classified in class 435, subclass 6, for example.
 - IV. Claims 20 and 21, drawn to a method of identifying an allele in a nucleic acid molecule by hybridizing at least one primer, which is attached to a bead, to a heterosequence site, elongating the primer, dissociating the primer from the nucleic acid, hybridizing the extended primer with a second primer attached to a bead, elongating the second primer and identifying heterosequence sites using either one of the extended primers or both of them, classified in class 435, subclass 91.1, for example.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1637

2. Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to methods which have different method steps, starting materials and goals.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
